

LED svjetla za isticanje PZ

LED treptač za obilježavanje pješackog prijelaza

Description:

High visibility LED lens for pre-signaling pedestrian crossings. The device has the purpose to advise the driver to slow down, because of the presence of a pedestrian crossing.

Strengths:

Easy to install on a sign (without case) and on poles (with case), the LED lens guarantees high brightness and low consumptions. We suggest the use with products related to the pedestrian save (see page 15 for the graphic sketch of the related products).
